

Acknowledgements

Special thanks to Daniel Baumann & Anthony Challinor for their excellent cosmology notes. For the cosmology section, I use them extensively. They were made available to the students along with their hand written notes.

I have also used material from Dodelson's "Modern Cosmology" & Peter Schneider's "Extragalactic astrophysics & cosmology". In the Galaxies part, I benefited from discussions with Andrea Iella.

<u>CONTENTS</u>	Lectures: 1-8	Geometry & dynamics of homogeneous-isotropic universe.
	Lectures 9-12	Thermal Early Universe
	Lectures 13-21	Evolution of cosmological inhomogeneities
	Lecture 22-28	Galaxies, clusters & BHs.
